Department head over 4 full time employees, 2 of whom are direct reports, and 5 to 10 student employees depending on resourcing. Responsible for long

term strategy for the Libraries, including drafting the Libraries Technology Plan, setting departmental goals and priorities, and recommending allocation of technology resources to the libraries's Deans Advisory Council. 40 hrs/wk

Florida Virtual Campus

Gainesville, FL

April 2015 – June 2020

Digital Library Services & Open Educational Resources Coordinator

The Florida university and community college library systems have a centralized organization for technology services, the online catalog, and electronic resources licensing - the Florida Virtual Campus (FLVC). The Florida Academic Library Services (FALSC) is a branch of FLVC. I supported the digital library section in this organization, and worked to support the statewide Islandora platform, currently powering digital libraries for 13 campuses with 11 more digital libraries in development for future launch, and Florida Online Journals, a platform implemented in Open Journal Systems (OJS) software and currently hosting 23 journals. In support of the digital library platform, I worked with a team to maintain documentation, including a FALSC support wiki geared toward libraries in Florida, contributing to the open source community through documentation and maintaining portions of a training manual for the Islandora software, and I frequently met with incoming librarians and archivists around the state to onboard and introduced to technologies supported by FALSC. In my time at FLVC/FALSC, I became comfortable in backend technologies which underlie the web HTML and desktop software, including significant time in a Unix environment, and passing familiarity with SQL and shell scripting. I also became familiar with XSLT and XML manipulation, and was the primary maintainer of metadata XML forms used in the Islandora platform, including XSLT and XPATH to interact with records. Routinely coordinated and led technical work in migrations between digital library hosting platforms. Led the statewide migration from Archon to ArchivesSpace during winter of 2018/19. Until summer 2019, FLVC operated the Florida Digital Archive, a digital preservation system used by all state universities in Florida except for Florida Polytechnic. I was briefly a backup contact for the Florida Digital Archive, and attended meetings and discussions related to assessing possible replacement software. Through this I have recent familiarity with digital preservation. Coordinated content and technical aspects of implementing the Florida Open Academic Library, Florida's centralized search of digital library materials from around the state. I inventoried what open access materials were made available through Florida public higher education and worked with computer programmers regarding how to harvest records through OAI-PMH and present records centrally in a federated search. 40 hrs/wk

Sarita Kenedy East Law Library, St. Mary's U. San Antonio, TX

SKILLS

Web Development

Understanding of electronic resource links, and proxy logins. Experience with EZproxy, and Serial Solutions 360.

Proficient in HTML, CSS, XML, Adobe DreamWeaver, Adobe Contribute, sound editing software such as Sound Forge and Audacity, and graphics editing software such as Adobe Photoshop, Adobe Illustrator, and Gnu Image Manipulation Program.

Extensive experience in CMS administration including scoping user permissions in Drupal, LibGuides, and several library specific and publishing industry platforms. At FLVC, I regularly scoped user permissions, issued accounts at the appropriate permission level, and provided training materials around the user roles established at FLVC.

Content Management Systems (CMS)

Strong background in administration of LibGuides.

Experience with Drupal, and Wordpress, including configuration, and systems administration. Extensive experience in configuring Drupal 7 (Islandora 7 uses Drupal 7 for a front end).

Extensive background in library publishing systems and digital library systems including providing tech support to libraries regarding their use of the following platforms Digitool, Open Journal Systems, Archon, ArchivesSpace, and Islandora.

Database Administration

Proficient with XML, importing and exporting metadata and datasets, and database design. Working knowledge of PHP and MySQL.

Some XSLT experience. Contributions can be viewed at <https://github.com/wrandtkeflvc> which has some public work with software for editing XML records. I also manipulated XML records during migrations onto and off of various software platforms run by FLVC.

Digital Libraries

Knowledge of and course work in a wide variety of metadata standards, including Dublin Core, MODS, METS, RDA, EAD, and MARC. Knowledge of and coursework in controlled vocabularies and authority control, including Library of Congress Subject Headings (LCSH).

Extensive experience with MODS. While at FLVC, I was the primary maintainer of forms for editing MODS records in the Islandora platform used by 13 university and college libraries in Florida for digital library hosting. While at FLVC, I was routinely responsible for metadata quality control on MODS records, and for examining software that crosswalks

between MARC and MODS or vice versa.

Experience with METS. At FLVC, I worked with troubleshooting issues that might occur in crosswalking the METS structmap to JSON. I also worked with analyzing METS records for descriptive metadata and repurposing descriptive metadata from the dmdsect portion of the METS record.

Experience with EAD records. I was the primary contact at FLVC for the statewide migration from Archon to ArchivesSpace. In this role, I reviewed data quality issues reported by archivists around the state. When a data quality issue was noted by any institution, I assessed all institutions for that issue and as appropriate put out centralized guidance and documentation to assist in getting records smoothly and accurately transitioned.

Experience with Islandora and Digital Commons. Knowledge of other platforms including DSpace, and ContentDM.

Significant experience with Omeka: developing themes, debugging plugins, configuration, and system administration.

Good background knowledge in document preparation using Adobe Acrobat Professional including optical character recognition, redaction, and batch processing. At FLVC, I tended to do preliminary analysis of "problem" PDFs which load irregularly onto any platform (ie. Thumbnails aren't generated, MIME type detected incorrectly), determine whether the problem is in the PDF or the software platform, and appropriately work with the library to adjust workflows or with programmers at FLVC to fix any software issue.

Experience digitizing paper, photographs, and microfilm using a variety of equipment.

Experience outsourcing digitization, including determining required specifications, reading contract or purchase information for digitization services, and quality control on files.

Experience advising university and college libraries as they undertake digitization and digital publishing projects on their campuses.

Scripting

Working knowledge of Visual Basic Applications; some Visual Basic; coursework in C.

XML manipulation using XSLT/XPATH and Saxon.

Experience analyzing and batch editing XML files with MARCedit.

Extensive experience writing shell scripts in Unix for moving, renaming, and manipulating large sets of files.
